

PRODUCT INFORMATION

Isoclean® Hood & Safety boots

Application area and properties

- + **Safety and wearing comfort:** Protective equipment specially designed for the cleanroom. PPE protective equipment class I. offers great protection against fine particles and fibres larger than 1 µm. Virtually lint-free and antistatic. Specially cleaned. **Protective hood:** With elasticated cuffs, bound seams. Cleaned and packaged under cleanroom conditions. **Overboots:** Slip-retardant sole, tunneled elasticated seams, with tie strap.
- + **Application area:** Especially suitable for cleanrooms. (ISO class 4/5 and GMP class A/B)
- + **Protective properties:** Good protection against particles >1 µm and particles. Tested Tyvek® material.
- + **Directions for use:** Keep away from flames or intensive heat.
- + **Change interval: Single use!**
- + **Before use:** Check for any damage! **Do not use damaged hoods and boots!**
- + **Disposal:** Waste requiring supervision or special supervision¹⁾; collect and dispose of waste separately!
¹⁾: Waste in accordance with the German law § 41 of the KrW-/AbfG.
